Employment Practices Liability: Settlements and Verdicts

Every employer is keenly aware of the current trends and developments in litigation arising from the workplace. Discrimination, wrongful termination, defamation, and sexual harassment claims in the #metoo era, capture headlines and crowd the dockets of state and federal courthouses around the country. The focus of the employer includes not just litigation strategy, but also risk management and insurance.

There is a considerable demand for information about the cost and settlement value of these claims. Unfortunately, there are few comprehensive sources for such information. This is attributable to many factors: the claims may be brought before a wide assortment of federal and state agencies, such as the EEOC and/or state and local civil rights commissions; the claims may be litigated in either state and federal courts; many settlements are not disclosed because confidentiality is at a premium in such cases, particularly for the employer; employment cases are not always categorized as such; and appeals are common in employment cases.

Here we present a sampling of the largest reported settlements and verdicts in the employment discrimination arena in the U.S. over the past five years. The cases are arranged by the size of the settlement or verdict. We have identified the state of each case and indicated whether the case was in state or federal court. When possible, we have broken out any punitive damage award and explain a bit about the allegations made by the plaintiffs. Each case is categorized as “Gender Discrimination” or “Disability Discrimination” or whatever other description best identifies the case by type. The cut-off point of \$2 million is arbitrary. There are hundreds of additional cases with settlements or verdicts in excess of \$1 million, for example, but logistics preclude tracking and listing them on a regular basis.

The information was gathered from many sources – jury verdict services, attorneys, media reports, and numerous public records resources. It should be noted that many, if not most, of the multi-million dollar verdicts were appealed or an appeal is pending, and the final figures may be lower. The figures do not include defense costs (which can eclipse the resolution amount in many cases) unless otherwise indicated.

This summary is intended to be instructional – to provide information about the potential exposure associated with resolving employment litigation. It does not purport to be all-inclusive. Additions since the last edition are highlighted. Readers will note that an unusually high proportion of the new additions are cases that went to verdict instead of settlements.

If you are aware of a non-confidential employment practice liability settlement or verdict within the last five years in excess of \$2 million that is not listed here, please call us or e-mail your comments and cases to: JRyan@kbrlaw.com. We appreciate all input.

She also cited incidents where the yoga mogul demeaned her and other women, including forcing her to meet in his hotel room at night while he was being massaged by other female students and insisting she join. The complaint asserts she was first hired as chief, without applying for the job, due to her "token status" and she was subsequently paraded around as a prop for city leaders to celebrate themselves for having a female police chief. She alleges she was subjected to hostility, including male subordinates who referred to her as "that woman" and comments, such as officers saying a woman could not do the chief job, and accusing her of taking the job from a male co-worker, Taylor, who felt he deserved the position. Taylor also reportedly threatened other officers, saying they needed to choose sides because the chief would be "gone in six months." The chief reorganized the department to remove Taylor from the chain of command due to the vitriol he was spreading, and alleges he called her on the phone late at night, screaming that he would make her resign if she did not do so herself. She asserts she reported the harassment for ten years, but nothing was done. Then in 2013, the chief was terminated by the mayor without explanation and escorted from the building; an hour later, she received a text from him saying "it was retaliation without a doubt!!" She was then replaced by Taylor, who was given \$60,000 more a year in salary than she was making when she was terminated.</p>

Specifically, the Haitian employees were told not to speak Creole, although the Hispanic employees were allowed to speak Spanish. The Haitian employees were also given difficult tasks that Hispanic workers were not asked to do, and were referred to as “slaves.” The EEOC claims that SLS South Beach made the decision to outsource staffing to an outside agency, but did not encourage any of its black Haitian employees to apply with the new agency or offer them the opportunity to do so. When the staffing agency took over, at least 15 Haitian employees were fired all at once and replaced with light-skinned Hispanic employees already wearing uniforms as the Haitian employees were being escorted out. The EEOC argued these firings were not based on performance but on race, color or country of origin. In addition to the payment, the company agrees to a three-year mandate for antidiscrimination training for human resources officers, managers, supervisors and staff employees, to establish antidiscrimination policies, and to submit to the EEOC comprehensive data on any terminations, layoffs or involuntary separations that may occur over the three-year period.</p>
